

## Aquawood Covatec Plus 20

5050

Water-based, **matt**, **opaque finishing coat** for **wood/aluminium windows and wood/aluminium exterior doors**, for industrial use.

Optimised for a 2 or 3-layer coating system

	PRODUCT DESCRIPTION
General	Water-based, matt, pigmented finishing coat. Stand-out features of this product include very good block resistance, very good impact strength, rapid establishment of water resistance, short drying times, improved resistance to mechanical damage, a natural look and a pleasant feel. Good non-sag properties on vertical surfaces and optimal flow. Particularly low number of micro-bubbles during airless spray application due to highly active defoaming agents/deaerators.
Special properties and standards	
	• DIN 53160-1 and DIN 53160-2 Perspiration and saliva-proof properties
	• ÖNORM EN 71-3 Safety of toys; migration of certain elements (free of heavy metals)
	• Declared in baubook Product has been declared and validated
	• French ordinance DEVL1104875A Marking of construction coating products for their emission of volatile pollutants: A+
Application area	Dimensionally stable wood-aluminium components, such as e.g. windows and front doors. For humid areas (e.g. indoor pools) only with a special coating system.
	PROCESSING
Processing instructions	<ul> <li>Please stir the product before use. However, prevent entry of air while stirring.</li> </ul>
£	<ul> <li>The temperature of the product and object, and the room temperature must be at least + 15 °C.</li> </ul>

ADLER-Werk Lackfabrik, A-6130 Schwaz Fon: +43/5242/6922-190, Fax: +43/5242/6922-309, Mail: technical-support@adler-lacke.com

Our instructions are based on the current state of knowledge and are intended to advise the buyer/user to the best of our knowledge, but must be individually adapted to the areas of application and processing conditions. The buyer/user is responsible for deciding on the suitability and use of the supplied product, which is why we recommend that a sample be produced to check the suitability of the product. In all other respects, our General Terms and Conditions of Sale apply. All previous data sheets lose their validity with this edition. We reserve the right to make changes to container sizes, color shades and available gloss levels.

- The optimal conditions for use are between 15 25 °C with a relative atmospheric humidity between 40 80 %.
- Too high dry film thicknesses from approx. 120 µm reduce the diffusion capacity and should thus be avoided.
- Sealants must be compatible with the coat and may only be applied once the paint has dried through. Sealing profiles with plasticizers tend to stick together in combination with paints. Please only use those types that have been tested.
- When changing from Aquawood Covatec Plus 20 (5050) to other waterbased paint systems, care must be taken to adequately clean the pipes and spray equipment, preferably with warm water.
- Any change in the processing sequence, environmental conditions, nonobservance of instructions or the use of products not listed may have an unfavourable effect on the result. Deviations lead to film and adhesion problems as well as to impairments with regard to weathering and color stability.
- Please follow our ARL 300 Working guideline for coating dimensionally stable and limited dimensionally stable construction elements - General part along with all standards and guidelines for window construction.

	Airless	Airless air-supported (Airmix®, Aircoat, etc.)	
Spraying nozzle Ø (mm)	0,28 - 0,33		
Spray nozzle (Ø inch)	0,011 – 0,013		
Nozzle angle (°)	20-40		
Spraying pressure (bar)	80 – 100		
Vaporizer Air (bar)	-	0,5 — 1,5	
Spraying distance (cm)		25	
Diluent		Water	
Diluent amount added (%)		0 – 5	
Applied quantity per application (g/m <sup>2</sup> )		220 - 370	
Wet film (µm)		175 - 300*	
Dry film complete coating system (µm)		100 - 120	

\*depending on the intermediate coat used

The product is ready to use.

The shape and surface condition of the workpiece as well as the type of application influence the actual consumption. Accurate values for consumption must be obtained by applying trial coats in advance.

## Application technique

Drying times	Dust-dry (ISO 1517)	ca. 1 hour(s)	
(at 23 °C and 50 % rel. humidity)	Tack-free	ca. 3 hour(s)	
() 12h	Stackable with PE fine foam spacers at room temperature	ca. 5 hour(s)	
	Stackable with PE fine foam spacers after forced drying 20 minutes evaporation zone / dripping zone 90 minutes drying stage (35 – 40 °C) 20 minutes cooling stage	ca. 130 minutes	
	Recoatable	ca. 12 hour(s)	
	The figures given above are reference values. The drying time depends or the type of substrate, coat thickness, temperature, air exchange and relative atmospheric humidity.		
	Lower temperatures and/or high level of atmospheric humidity can increase the drying time.		
	Avoid direct sunlight!		
Cleaning the working	With water immediately after use.		
equipment	To remove dried paint residues we recommend using A (diluted 1:1 with water).	Aqua-Cleaner (8029)	
	SUBSTRATE		
Type of substrate	Wood in accordance with the guidelines for window construction.		
Substrate property	The substrate must be dry, clean, capable of holding the paint, free from separating substances such as grease, wax, silicone, resin etc. and free from wood dust, as well as tested for suitability for coating.		
Wood moisture	13 % ± 2 %		
	COATING SYSTEM		
General	The following coating systems are exemplary.		
Impregnation	1 x Aquawood Primo A2 (5452)		
	Intermediate drying time: approx. 4 hours		
	Use wood preservatives safely. Always read the label and observe the respective technical data sheets of the products before use.		
	Please follow our ARL 056 - Working guideline for the use of wood preservatives.		
	Or alternatively, if no chemical wood protection is desired or has been agreed upon:		
	1 x Aquawood Primo TG WF (5462)		
	Intermediate drying time: approx. 4 hours		
Intermediate coat	For softwoods, no intermediate coat is required.		
	Hardwoods and Larch:		
	1 x Aquawood Intercare ISO (5503)		
	1 x Aquawood Intercare ISO (5503)		
	1 x Aquawood Intercare ISO (5503) or		
	•		

	or 1 x Aquawood Intercare ES (5501)
	Wet film thickness: 150 - 200 μm
	Intermediate drying time: approx. 4 hours
Intermediate sanding	Grit size 220 – 280
	Remove sanding dust.
Finishing coat	1 x Aquawood Covatec Plus 20 (5050) <b>Softwoods:</b>
	Wet film thickness: 275 - 300 μm
	Hardwoods and Larch:
	Wet film thickness: 175 - 200 μm
For front doors	An additional application of Aquawood Protect (5128) (colourless two- component varnish) is necessary.
	MAINTENANCE
Сате	The durability depends on several factors: these include particularly the type of weathering, constructive protection, mechanical stress and the choice of colour applied. To obtain long durability, regular inspection, maintenance and, if necessary, repair measures are necessary.
	Annual cleaning with Top-Cleaner (7208) and maintenance with Top-Care (7227) in the package with Windoor Care-Set (7229).
Maintenance	Please follow our ARL 304 - Working guideline for coating dimensionally stable and limited dimensionally stable construction elements - Maintenance and repair.
	ORDERING INFORMATION
Size of trading unit	60 kg, 120 kg poly drum
Colour shades / Glosslevels	<b>Standard colour(s):</b> RAL9010 Reinweiß (5050009010) RAL9016 Verkehrsweiß (5050009016) NCS S 0500-N (5050010001)
	Other colour shades on request
	In order to ensure uniformity of the colour shade, use only material with the same batch number on a given surface.
	It is recommended to prepare a trial colour sample on the original substrate using the coating system selected in order to assess the final colour shade.
Supplementary products	Aqua-Cleaner 8029 (8029) Aquawood Intercare ISO (5503) Aquawood Intercare SQ (5522) Aquawood Intercare ES (5501) Aquawood Primo A2 (5452) Aquawood Primo TG WF (5462) Aquawood Protect (5128) Top-Care (7227) Top-Cleaner (7208) Windoor Care-Set (7229)
	Please refer to the corresponding technical data sheets of the products.

	FURTHER DETAILS
Durability / storage	Min. 1 year(s) in the original sealed containers. Make sure the product is protected against moisture, direct sunlight, frost and high temperatures (above 30 °C). Close opened containers well and use up the content as soon as possible.
Technical specifications	VOC content of the ready-to-use mixture: Limit value according to Directive 2004/42/EC for Aquawood Covatec Plus 20 (Cat A/d): 130 g/l. Aquawood Covatec Plus 20 contains a maximum of 40 g/l VOC.
Giscode	BSW20
DGNB (German Sustainable Building Council)	Quality level 4 (with factory coating)
Safety information	The product is only suitable for the industrial and professional use. When sanding, use at least a P2 dust filter as personal safety equipment to protect against abrasive and wood dust. In case of hardwood (especially for Beech, Oak) a dust filter P3 is recommended. The inhalation of paint aerosols during spray application must generally be avoided. This is ensured by the proper use of a respirator (combination filter A2/P2). Further information on the subject of safety during transport, storage and handling as well as disposal can be found in the relevant safety data sheet. The current version can be accessed on the Internet at <b>www.adler-lacke.com</b> .
